PROFILE

Highly skilled computer animator with over 17 years character animation experience in feature films, 12 years experience as an Animation Supervisor, and Head of Character Animation on a televised short. Strong working knowledge of feature and short-story animation development and workflow. Experienced writer for short story, film, and animation.

EXPERIENCE

1997 – PRESENT **DREAMWORKS ANIMATION** REDWOOD CITY, CA
Supervising Animator

I work closely with the Head of Character Animation and other Supervising Animators to manage and run the animation department. I am the creative lead for specific sequences and characters. In pre-production I am responsible for developing the look and personality of characters. During production I animate key shots that help to define the acting and set the tone of a scene. I mentor animators, providing guidance, experience and insight. I work closely with my team to develop and improve their work and establish a consistently high level of animation performance, while ensuring all deadlines and quotas are met. I interact with the Director to define the acting requirements on both a sequence and individual shot basis, and to ensure the Director's creative goals are fulfilled. I work closely with other departments to improve the performance requirements of the character rigs and animation tools, and to facilitate a smooth running production.
